

The **Celebration** range is a system of disposable confetti and streamer launchers powered by compressed gas.

Featuring a safe and regulation free alternative to pyrotechnic effects, the **Celebration** launchers come in several sizes firing up to 25mtrs and covering over 140m².

Bright and colourful, each unit comes preloaded with a mixture of multicoloured paper and metallic Confetti & Streamers, all flame proofed and colourfast.

Operation is as simple as twisting the base of the hand held units.

The eight shot electric launcher can be fired directly from the front panel or from the supplied remote control, offering four different launch sequences.

For that special celebration, use the Champagne Cannon. Available in two sizes, the launcher is concealed within the authentic looking bottle and is ready to pop!
